

# Staffing With WELLHART

## About Us

Wellhart was founded in 2018 with a mission to tackle the urgent healthcare staffing problem at commercial medical facilities and local, state, and federal government agencies.

Clients choose Wellhart because of our leadership's combined century of staffing experience and our organization's proactive approach to locum tenens recruiting. These key differentiators mean that we are continuously adding new and highly-skilled MDs, CRNAs, nurse practitioners (NPs), and physician assistants (PAs) who work as anesthesiology professionals, hospitalists, emergency medicine professionals, and radiologists.

## Our Support Teams

### LICENSING

The licensing team proactively purchases licenses for providers in order to expand the databases' geographic footprint. This strategy helps fill coverage gaps in hard to fill locations.

### TRAVEL

The travel team is responsible for coordinating all travel-related accommodations for providers, including flights, hotels, and rental cars (when needed) for the length of the assignment.

### RISK

The risk team is responsible for overseeing all internal quality assessments, conducting background checks and occupational health screening through Assurehire, and reviewing the status of licenses and certifications to ensure that all providers have malpractice insurance.

## Our 1-on-1 Approach

When you choose to partner with Wellhart, you'll be assigned a single point of contact for any questions, requests, or comments that you have. Our entire patient-centric staffing process revolves around saving you time and energy on finding a high-quality provider.

Our teams are meticulously organized into specialized medical specialties, equipping them with in-depth knowledge and expertise in their respective core clinical areas. This specialization positions us as subject matter experts, ensuring that we can effectively match you with the most qualified candidates for your position.

To enhance our operational efficiency and elevate our performance standards, Wellhart embraces cutting-edge technology, including artificial intelligence (AI). Our advanced technological infrastructure enables us to leverage AI capabilities in our processes, resulting in a higher level of accuracy and efficiency.
